

BULBS FOR EASTER FORCING

Use regular bulbs and plant in mid-October. Initiate a root system by keeping temperature at 55 - 58 F for three weeks, then drop temperature to 41 - 45 F until late December and shoots are visible. Once shoots are fully emerged (about 1"), lower temperature to 34 F until 3 1/2 weeks before Easter. Bring into greenhouse and force at 65 F.

Hyacinths - Size 17/18 - Packed in Bags of 50
