Herbs aren't just for eating!! They make great accent plants in the garden as well as in containers. Container gardening is becoming more and more popular, it's fun to create and gives the customer instant color for their home. Adding herbs to your containers adds fragrance, color and texture. Be creative and let your imagination go. Remember to tickle the rosemary flowers before eating them. Fairies hide their babies in the rosemary flowers.

- *** These plants are great in hanging baskets.**
- **** These plants have the extra bonus of blooming.**
